DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 21, 2005 has been entered.

Claim Objections

2. Claim 10 is objected to because of the following informalities: -- the -- should be inserted before "opening" in claim 10, line 11. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 1,3-5, and 10-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the claims are rejected for the following reasons:

There is insufficient antecedent basis for the following limitations in the claims:

- Claim 1 recites the limitation "the outside surface of the back panel" in lines 12 through 13.
- Claim 1 recites the limitation "the respective surface of the back panel" in line 18.
- Claim 1 recites the limitation "the effective bottom of the container" in line 22.
- Claim 10 recites the limitation "the front surface " in line 8.
- Claim 10 recites the limitation "the front surface of the container" in line 11.
- Claim 10 recites the limitation "the back surface " in line 14.
- Claim 10 recites the limitation "the effective bottom of the container" in line 27.

Art Unit: 3727

- Claim 16 recites the limitation "the adhesive hang tab" in line 1.

Applicant should carefully review the claims for other similar deficiencies and correct them as appropriate.

No seal is set forth at the first side edge and the second side edge of the front and back panels in claim 10. Therefore, it is unclear how the top seal, the bottom seal, and the surfaces form a fluid tight cavity.

The structural relationship of the hang tabs and the respective side edge of the bag is not clearly set forth in claim 10, lines 15-17. It is suggested -- is to the side edge -- is inserted after "opening" at each occurrence.

Dependent claims not specifically mentioned are rejected as depending from rejected base claims since they inherently contain the same deficiencies therein.

Allowable Subject Matter

4. Claims 1,3-5 and 10-16 appear to be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

5. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely

Art Unit: 3727

asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number 571-273-8300 on the date shown below:

Typed or printed name of person signing this certificate
